Summary

Software Engineer and Business Analyst with 1+ year of experience in product-based development, business analysis, and product delivery. Proficient in SQL, Power BI, Microsoft Excel, React.js, TypeScript, and Tailwind CSS. Experienced in frontend development, backend API integrations, AI-assisted development using GitHub Copilot, manual testing, requirement analysis, and cross-functional collaboration to deliver scalable, data-driven solutions.

Education

Dadi Institute of Engineering and Technology B.Tech in Data Science Coursework: Database Management (SQL), Python, Power BI, Data Analytics	Dec 2021 – Apr 2025 CGPA: 7.36/10
Sri Chaitanya Junior College Board of Intermediate Education	Apr 2021 Percentage: 73%
Chalapathi E.M School Secondary School Certificate	Apr 2019 Percentage: 87%

Technical Skills

Programming Languages: SQL, TypeScript
Frontend Technologies/Frameworks: React.js, Tailwind CSS, Vite
Backend & API Integration: Node.js, Express.js, REST APIs
Database: MySQL, PostgreSQL
Analytical Tools: Excel, Power BI
Libraries & Frameworks: NumPy, Pandas, Matplotlib
Development & Deployment Tools: Git, GitHub, GitHub Copilot, Visual Studio Code, SQL Workbench, Hostinger

Experience

- **Software Engineer**, Synvide Business Solutions July 2025 – August 2026
 - Started as a Frontend Developer, developing scalable web applications using **React.js, TypeScript, and Tailwind CSS**
 - Built reusable UI components, integrated backend APIs, and managed frontend-backend data flow
 - Utilized **GitHub Copilot** and AI-assisted development tools to improve development efficiency and code quality
 - Performed manual testing, bug validation, and quality assurance to ensure application reliability
 - Transitioned into a **Business Analyst** role within the Product Management team, gathering and analyzing business requirements and collaborating with cross-functional stakeholders
 - Leveraged **SQL, Power BI, and Microsoft Excel** to analyze business data, create reports and dashboards, generate actionable insights, and support product decision-making
 - Contributed to product planning, requirement documentation, release coordination, and aligning product features with business objectives
 - **Key Products:**
 - **Oshoppe** [Website](#)
Developed reusable React components, implemented e-commerce frontend features, and integrated REST APIs to deliver seamless user experiences.
 - **OPD365** [Website](#)
Developed healthcare workflow modules, scalable frontend features, and integrated backend APIs to streamline clinical workflows.
 - **NearHub** [Website](#) | [Android App](#)
Developed and enhanced a hyperlocal marketplace platform connecting nearby buyers and sellers.
Collaborated on UI/UX implementation, backend API integrations, manual testing, product planning, and feature coordination.
- **Data Science Intern**, Datavalley India Pvt Ltd. Mar 2024 – Jul 2024
 - Performed data preprocessing, feature selection, and model building using Python
 - Worked with NumPy, Pandas, Matplotlib, and Scikit-learn
 - Built Power BI dashboards for insights and reporting

Projects

- **MBR Fashion Hub – FullStack E-commerce Platform**

May 2026

- Developed and deployed a full-stack e-commerce website for a fashion client
- Built responsive frontend using **React.js, TypeScript, Tailwind CSS, and Vite**
- Developed backend APIs using **Node.js and Express.js**
- Integrated **MySQL** database for managing products, users, orders, and inventory
- Implemented online payment functionality using **Razorpay Payment Gateway**
- Deployed the production website using **Hostinger**
- Enabled users to browse products, buy items online, and complete payments securely
- Leveraged AI-assisted development tools for efficient debugging, code optimization, faster development workflows, and enhancing overall application performance
- Implemented admin panel functionality for product, inventory, coupon, banner, and order management.
- Live Website: mbrfashionhub.com

- **Predicting Blood Donor Return Using Minimal Behavioral Data**

Nov 2024 – Mar 2025

- Built a predictive model to predict donor return using minimal data, achieving 84.17% accuracy
- Utilized SQL for data extraction and transformation, and performed data cleaning and model training
- Analyzed donor trends and visualized key insights with Power BI dashboards
- **Tools/Technologies Used:** Jupyter Notebook, MySQL Workbench, Power BI, Pandas, NumPy, Scikit-learn

Certifications

- Azure Fundamentals (Microsoft)
- HP LIFE – Data Science & Analytics
